SUMMARY

An experienced software engineer with a track record of almost a decade in the technological industry, adept at analyzing, designing, and creating innovative software solutions. He is an expert in Python/Java/Kotlin, SOAP, and RESTful APIs, while also fluent in working with JavaScript frameworks like Angular and Next.js. Timothy has a demonstrated history of working in the financial sector, agency industry, and identity management sector where he has built systems with a focus on reliability, performance, and scalability.

EXPERIENCE

BanqueMisr, Senior Software Engineer (Andela Network)

Egypt, Cairo (REMOTE-Contract) | December 2022 - May 2025

- Migrating base services to utilize Graalvm native image using Spring buildpack, for faster startup time of microservices and reduced memory footprint.
- Refactor core libraries used for logging and hiding sensitive data by customizing sl4j libraries.
- Optimized Reporting service internally using CQRS, and Denormalization of MongoDB collections.
- Increased test coverage for Retail banking services by writing and reviewing integration tests and unit tests using libraries like Mockito, Wiremock, and Castle mock.
- Reduced OSS vulnerabilities by continuous scanning and updating of outdated libraries used by spring services.

Nomba, Senior Backend Engineer

Nigeria, Lekki Phase 1 | September 2022 - November 2023 (1 year 2 months)

- Built core services using gRPC and libraries used by other teams to ensure re-usability and a faster development time eg IAM, Storehouse,
- Developed a webhooks library used internally for pushing RESTFUL and SOAP related callback requests with provision for callback retrials and scheduled retrials using Quartz.
- Integrated to OpenID for custom app login using Auth0, and used CerBos to handle authorization.
- Improved onboarding process for users across multiple products by refactoring previous systems and the use of SSO.
- Implemented application event monitoring using prometheus and grafana.
- Review existing codes, and modules to identify technical debt, and code

EDUCATION

Masters in Data Science Management
(Rome Business School)
(2024 - 2025)

Higher National Diploma in Computer Engineering
(Yaba College of Technology, Nigeria)
(2015 - 2017)

Ordinary National Diploma in Computer Engineering
(Yaba College of Technology, Nigeria)
(2012 - 2014)

AREAS OF EXPERTISE

Java 7/8/11/17 (Expert, 6 years)
Kotlin, Golang, Unix, REST APIs
React.js, Vue.js, Angular 2+ (Intermediate, 4 years)
GraphQL
OAuth, SAML
Node.Js (Intermediate, 4 years)
Python (Expert, 4 years)
PHP (Intermediate, 2 years)
Oracle, MSSQL, Postgres, Mongo (Expert, 6 years)
Spring Boot (Expert, 4 years)
Dropwizard (Intermediate, 2 years)
Azure, AWS, GoogleCP, Digital Ocean, Heroku, Docker
Kafka, Redis, Rabbit MQ
Microservices
Hibernate
Agile Methodology

smells.
- Incorporated gRPC components libraries into legacy Spring projects

Seamfix, Software Architect & Technical Lead

Nigeria, Lekki Phase 1 | September 2020 - July 2022 (1 year 9 months)

Technical Lead (9 months)

- Led and mentored a high-performing Bioregistra engineering team of 8, establishing clear expectations, defining roles and responsibilities, and providing guidance and resources for team members to excel in their work.
- Redefined the engineering use of CI/CD tools, resulting in streamlined development processes and 25% faster deployment times.
- Reduced the number of pods assigned to services on Kubernetes by 20% through enhanced service operations and performance optimizations, resulting in a significant reduction in operational costs.
- Maintained strong relationships with internal and external stakeholders, ensuring effective communication and alignment of engineering efforts with project goals.

Senior Software Engineer (1 year)

- Migrated caching server from MemCache to Redis, hereby allowing services to benefit from multiple and synchronized clusters features provided by the Redis server.
- Converted key services from JEE to Spring microservices, allowing for better support and easy integration with spring cloud services.
- Engaged in design and architectural planning of new and existing microservices

3Line Card Management Limited, *Lead Backend Engineer*

Nigeria, Victoria Island | April 2019 - August 2020 (1 year 5 months)

- Restructured core and shared services for Freedom Network agency banking platform, hereby increasing customer engagement and revenue up to **10x** more within a period of **3 months**
- Development of Cash Disbursement Application for NCTO using microservice architecture with Spring, and Apache Kafka, which was able to handle more than **3 million** concurrent users.

Longbridge Technologies, *Software Engineer*

Nigeria, Ikeja GRA | November 2014 - April 2019 (4 years 6 months)

- Lead developer in the development of a loan application (Kastle) for FCMB by integration to their core banking software (Finacle), and the development of custom FI scripts.
- Actively remodeling, and migrating existing financial Applications (IntegrifyPlus customization, Webfontain) from JEE/Play to Spring framework for easier maintenance, scalability, and productivity.

SOFT SKILLS AND COMPETENCIES

Collaborative Team Player with Effective Mentoring Abilities

Rapidly Assimilates Problems and Requirements

Meticulous Attention to Detail

Creative Problem Solver

Strong Interpersonal and Communication Proficiency

Innovation and Continuous Improvement

AWARDS

Award of Excellence
NACOMESS (August-2016)
Yabatech: Offered Academic Service.
